

Christopher Kenreigh

Senior Director, Product Design | AI-Native Design Practice | Design Systems & Governance |
Multidisciplinary Team Leadership | Experience Strategy

480-206-2145 | c.kenreigh@gmail.com | [LinkedIn](#) | [Portfolio](#)

Summary

"Design leader with 12+ years building AI-native design practices, scaling multidisciplinary teams, and delivering intelligent, trustworthy, emotionally resonant experiences that raise design maturity and measurably move business outcomes."

- 12+ years of end-to-end product design leadership across consumer-facing platforms, enterprise SaaS, and AI-integrated product experiences
 - Proven AI-native practitioner — designed and shipped LLM-powered products, defined AI-accelerated design workflows from discovery through delivery, and raised team AI fluency org-wide
 - Design systems architect — built and governed scalable component libraries with reusable patterns adopted across web, iOS, Android, and CMS platforms with 60–90% org reuse
 - Research-driven experience leader — grounds every design decision in behavioral insight, continuous insight loops, usability testing, and real-world human signals
 - Executive-level presence — elevates design as a strategic driver; partners upstream with Product, Engineering, Content, and ML to deliver outcomes, not just interfaces
 - Org multiplier — coaches, mentors, and grows design teams; embeds AI playbooks, design governance, and quality standards that scale great work beyond the design team
-

Experience

Director of Product Design (Principal / Staff)

[Plexus Worldwide](#)

📅 05/2024 – Present · 📍 Phoenix, AZ | Office

- Led multidisciplinary design team of UX, content, and interaction designers across 3 international regions — setting the quality bar, establishing design standards, and coaching AI fluency across every practitioner
- Defined and deployed an AI-native design practice: architected LLM-powered persona agent combining behavioral, demographic, and psychological intelligence — reversing a –17% operating margin to +2% within 4 months
- Drove experience strategy upstream: partnered with Product, Engineering, and BI leadership to surface behavioral patterns and intent via Power BI; redesigned mobile-first PDPs, PLPs, and checkout flows — cutting abandonment 43%
- Grounded design in real human insight: facilitated discovery workshops, continuous A/B testing, and behavioral data loops to validate complex interaction decisions across cross-functional teams
- Built AI-enabled design system: consolidated 6 fragmented tools into one unified component library with governance standards, reusable patterns, and CMS implementation — achieving 60–90% org-wide adoption

- Raised team AI fluency: introduced AI-accelerated workflows from discovery through delivery, increasing sprint velocity 35%; embedded repeatable AI playbooks into daily design practice

Senior Product Design Lead

Freeport-McMoRan

📅 08/2022 – 10/2023 · 📍 Phoenix, AZ | Hybrid

- Led end-to-end experience design for complex enterprise digital tools in a regulated environment — delivering coherent, credible interfaces that improved operational efficiency 30% across web and mobile platforms
- Grounded design in behavioral insight: facilitated 10+ discovery and alignment workshops translating complex user needs into actionable product requirements across cross-functional teams
- Drove experience strategy upstream: presented design-led product roadmaps to C-suite, securing approval for 5 major product releases through clearly articulated, outcome-driven design rationale
- Architected and governed a scalable MUI React design system adopted across web, iOS, and Android — established documentation, contribution guidelines, and standards enabling engineering to build without friction

Senior Product Designer

OpenTech Alliance

📅 05/2021 – 08/2022 · 📍 Phoenix, AZ | Hybrid

- Elevated organizational design maturity — evangelized research-driven, human-centered design to C-suite, securing budget for 3 new UX initiatives and establishing design as a strategic driver of business outcomes
- Applied lean testing and behavioral data to redesign Point of Sale kiosk UI — boosting task completion 75% and demonstrating design's direct impact on revenue and customer trust
- Designed compliant user data capture processes meeting regulatory requirements — eliminating legal risk by 100% across consumer-facing flows
- Enhanced consumer e-commerce journeys through continuous insight loops and data-driven interaction improvements — increasing fulfillment efficiency 25%

UX Design Lead

Siemens

📅 07/2020 – 05/2021 · 📍 Phoenix, AZ | Remote

- Led systems-level design strategy across 4 simultaneous product initiatives — unified design system standards across cross-functional teams in a complex industrial software environment
- Built design governance infrastructure: produced documentation and standards that reduced internal dissemination needs 50%, enabling engineering teams to build consistently without designer mediation
- Drove experience strategy upstream — managed stakeholder alignment and secured executive approval for 2 high-impact design initiatives through outcome-driven rationale
- Designed hardware-integrated UI layouts for complex industrial applications including 3D and AutoCAD-connected interfaces

Senior UX Designer

Glynlyon Inc

📅 02/2014 – 04/2019 · 📍 Phoenix, AZ | Office

- Grounded design in real human insight: conducted user research and usability testing to roadmap UI features — increasing ease of use 65% across multi-platform digital products
- Set and maintained design quality bar for WCAG and ADA-compliant inclusive experiences across Android

and iOS platforms

- Communicated complex interaction concepts and technical feasibility constraints clearly to engineering and product stakeholders
- Led cross-functional teams through Design Thinking workshops — defining user needs, aligning on product strategy, and translating behavioral signals into design decisions

Key Achievements

- Reversed -17% operating margin to +2% in 4 months via AI-native persona platform grounded in behavioral and psychological intelligence
- 43% reduction in checkout abandonment through research-validated, conversion-focused interaction redesign
- AI-enabled design system achieving 60–90% org-wide adoption; 50% faster design delivery velocity; 3× more deliverables per sprint
- Raised team AI fluency: embedded repeatable AI-accelerated workflows increasing sprint velocity 35% — discovery through delivery
- Secured executive approval for 10+ major product initiatives through C-suite experience strategy presentations; design cited as strategic business driver
